Product Name

2 indicates it has shorter wings than original models of ToeOFF® or BlueROCKER®, pre-applied MikroFIX, and includes an interface starter kit.

½ indicates it has approximately ½ the heel height of original models of ToeOFF® or BlueROCKER®.

PRODUCT SELECTION GUIDE

The scales on this page and chart on following page are provided as general guidelines only. Each individual, based on their unique deficits, gait patterns, proprioceptive response, and lifestyle needs, will respond differently to any orthotic device. This will influence the function and compliance results.

Further information about intended use, indications and contraindications, and suggested modifications to assure optimum alignment and patient comfort can be found in the Professional Instructions packed together with each Allard AFO or can be downloaded from allardusa.com. You can also view our 8-step videos on our Allard USA YouTube channel.

ALLARD AFO PRODUCT RIGIDITY SCALE

Each Allard AFO offers different rigidity to provide the amount of support needed without over-bracing. The chart below shows the variance in the amount of support each AFO offers. For example, Ypsilon® FLOW½ would be considered for patients requiring minimum support, while BlueROCKER® for those that require most support.

ALLARD AFO FUNCTION SCALE

As an example, Ypsilon® FLOW½ allows for the most ROM while BlueROCKER® offers the least. On the other hand, if you look at stability, BlueROCKER® offers the most whereas Ypsilon® FLOW½ provides the least.
